GRINDROD BANK LIMITED
QUARTERLY PUBLIC DISCLOSURE REQUIREMENTS IN TERMS OF REGULATION 43
30 June 2017

	Grindrod Bank Limited R'000
Leverage	
Total exposures for the calculation of the leverage ratio	13,209,119 (e)
Total qualifying tier 1 capital and reserve funds	1,078,935 (a)
Leverage ratio at reporting date	% 8.17 (a) / (e)
Specified minimum leverage ratio	% 4.00
Maximum leveraged exposure	26,973,375

Material differences between the bank's total balance sheet assets, as reported in the Bank's financial statements (AFS), and the bank's on-balance sheet exposure measure.

The following are reported net in the AFS but split into an asset and a liability for regulatory reporting:

Deferred taxation

Derivatives

Portfolio credit impairments (deducted from advances in AFS but added back to exposure measure)

Key drivers of material changes

The level of retail deposits fluctuates significantly during a month, due to the timing of the retail pay cycle, impacting corresponding assets (interbank / SARB settlement account) and the leverage ratio denominator. The latter fluctuations are unlikely to result in a regulatory leverage ratio breach as the balance sheet size is significantly lower than the maximum leveraged exposure level possible based on current capital.

Additional disclosure

Additional disclosure can be found in the annual financial statements on the Bank's website, <https://www.grindrodbank.co.za>, under library.
